

## Event invitation

**19 September 2018**

### Re-imagining Ethernet Provision Industry Consultation

Launch web call 16:30 - 17:00 26 September 2018

Openreach Ethernet provision performance has improved dramatically over the last two years, but opportunities remain for continued improvement by working together more smartly.

We have identified a number of areas that offer both operational and customer experience benefits and we have a new design proposal for EAD provision that we believe unlocks these opportunities.

This design does imply some significant changes to how we collectively operate today, so we are going to be consulting on the design proposal and seeking your feedback.

I'm pleased to invite you to join us for a web call to share our vision and a high level overview of the design, and to initiate the consultation that will run from 26 September to 09 November 2018.

The call is scheduled for Wednesday 26 September 2018 at 16:30 for 30 minutes.

Please register [here](#)

I look forward to speaking to you on the call next week. If you are unable to join a replay will be available on the service pages of our website.

Regards

**Kevin Murphy**
