

Infrastructure Solutions

Whatever your network requirements Infrastructure Solutions can provide everything you need to build your network and help ensure that everything is in the right place at the right time.

Give us your requirements and we'll deliver your network.

Service benefits

Valuable expertise

Knowledge and advice on every aspect of your network build – from design through to floor space, power, sector specific issues and processes and how to deal with them.

Flexible resource

Scalability to meet the needs of your infrastructure build. Free up your own team and avoid the overheads of short term contractors who may not understand our systems and processes, take longer to deliver and cost more as a result.

Reduce risk and smooth delivery

By outsourcing your network requirements to Openreach we can ensure that everything is in the right place at the right time – helping you to meet your deadlines on time.

Break into new markets

Extend your reach to new areas of the UK or into new sectors.

Less hassle

A single point of contact to handle your infrastructure build leaving you free to concentrate on your core business*.

Integrated solution delivery

Co-ordination of orders, delivery dates and installation for multiple products at the same site*.

Satisfied customers

A managed solution means there's less change of things going wrong allowing you to focus on your customers.

Your total network solution

Everything you need to meet your customer's needs from a single supplier.

*With our project management option

Service features

- Everything you need to design and build your network and accommodate and install your equipment including: network, floor space, power, rack supply and installation by our experienced engineers
- Scalable resource and expertise to meet your needs
- Project Management expertise to help you deliver projects of any size and complexity*
- Coordination of orders, delivery dates and installation for multiple products at the same site*
- Our UK wide geographical reach means you can establish and build new networks without the need for local resources
- With our Professional Services offering we can even place your orders for you
- While we're there – our engineers can install your equipment at your customer's site with minimal training/briefing.

*With our project management option

How we work

Understanding and evaluating your needs

Utilising Openreach's considerable experience in network build we can design and build a network to meet your needs

Scoping your build

To determine your requirements, agree timescales, and ensure that nothing is overlooked

Drawing up an Infrastructure Solutions agreement

Our dedicated team are on hand to work with you on your key design deliverables, dates and modular requirements.
